

DOES YOUR CURRENT METHOD OF FALL PROTECTION MAKE YOU A TARGET FOR OSHA?

Introducing: Universal Safety Products

Temporary Guardrail System

Patent Pending

Let Cap Guard Save you Time and Money while enhancing Safety on the Job Site!!

Every year, falls on the worksite represent a large percentage of fatalities or injuries in the construction industry. Studies indicate that the use of fall protection systems are effective in reducing falls, therefore Universal Safety Products has developed a line of unique safety devices that addresses this issue.

CAP GUARD, a temporary guardrail system, was engineered and load tested by experts in the construction industry to exceed OSHA's strict fall protection regulations*. **PLUS** its simple design allows for attachment of a toe board.

Here are the benefits to using Cap Guard:

SAVINGS, SAVINGS, SAVINGS:

- Stop wasting money on expensive materials. In a cost comparison study, Cap Guard is less expensive to use as a temporary guardrail system versus the standard use of lumber or similar systems.
- Save substantial amounts of money! Cap Guard is a reusable temporary guardrail system that you can use from one project to the next.
- Don't be a **Target** for OSHA! Create a safe job site with Cap Guard and avoid accidents and OSHA fines!
- Fast, easy installation and removal will save you time in labor costs.
- Increasing safety on the job site can reduce your cost in worker's compensation claims and insurance premiums.

SAFETY, SAFETY:

- Meets and Exceeds OSHA fall protection regulations* and falling object protection regulations
- Operationally Safer!! Allows your employees to frame up the site without removing any of the OSHA required fall protection system.
- Made with smooth edges to protect your employees.
- Creates a safe work environment for your Workers and Visitors on the job site
- It's manufactured in a **Hazard Orange** powder coat for high visibility on the job site.

SIMPLE:

- Simple design makes it a user friendly safety product
- Fast and Easy to install and remove
- Easy to transport, it's 100% mobile!
- Constructed of Strong, Durable STEEL to withstand construction site abuse & **POWDER COATED** to withstand nature's elements.

Universal Safety Products safety-enhancing product line also includes Door/Window Guard. Open door and window frames are potential hazards and create a non-safe working environment. Door/Window Guard is also OSHA compliant!!
